Broad Policy

I. **Inception of School of Professional Attachment (SPA)**
   The present day youth has got unfathomable energy to get the best out of their education and life. Therefore to enhance the seriousness to help plan their careers better, the office of a TPO has been revamped into a full-fledged school — “School of Professional Attachment – SPA”. The sole objective is to make the students industry ready and capable of standing tall to face contemporary challenges of the corporate world and have a smooth transition from Campus-to-Corporate.

II. **Role of SPA**
   SPA is engaged in carrying out the following tasks:
   1. Enhancing student employability
   2. Improved industry internship attachment
   3. Increased students’ ownership
   4. Career counselling and gap analysis
   5. Continuous improvement in the systems and processes
   6. Higher and better job placements with a wider industry reach
   7. Obtaining industry feedback for improving the academic curriculum
1. **Enhancing Employability**

In addition to the hard (technical) skills, soft skills are required to be developed by a student to enhance employability. The main objective of professional attachment is to equip a student with the right kind of skills and attitude so that they can become more effective, efficient and productive in their employer organizations much sooner than otherwise. A lot of efforts are made towards this aspect.

- Engage in a regular interaction with the students starting from their induction into the university till the time they are placed.
- Prepare the students for all the facets of placement process:
  - Conduct online mock aptitude tests with full guidance
  - Arrange Pre Placement Interviews (PPIs) – a full dress rehearsal for facing the job placement interviews.
  - Practice for Group Discussions (GDs)
  - Inputs for improving presentation skills
  - Share “Information Bulletin” to keep the students well informed.
- Invited Talks – by inviting industry experts from perspective employers
- Arrange industrial visits

2. **Improved industry internship attachment**

Great emphasis is made to ensure students to be deputed to industry for their summer internship projects to gain real life work experience and promote chances for their employability with the same industries.

- Hold interactive sessions with the students to impress upon importance of internship projects for placements
- Sensitize students for the selection of industry
- Assistance in selection of companies for summer internship
- Ensure that each and every student gets absorbed by the industry
- Issue of NOC for the target company
- Maintenance of complete internship records
- Liaison with companies for placements

3. **Increased Students’ ownership**

In order to achieve a continuous and sustained growth, it is very important to have active involvement to the students, the real stakeholders. Two clubs have been floated, which have become very popular and effective.

- **Aarohan** – for all students except final year
  - Activities related with pre placement preparation
  - Extend help for professional grooming of students
  - Active involvement of student executive members from pre final year
- **Lakshay** – for final year students
  - Covers all the placement related activities
  - Registration by the students
4. **Career counselling and gap analysis**
   It has been seen over the years that students run only to what is visible e.g., the salary offered and don’t understand the importance of a suitable job profile. Personal one-on-one counselling sessions are held in helping to bridge the gap.
   - Scanning and explaining the job profiles offered by the companies.
   - Detailed interactive sessions with the students to clear their doubts.

5. **Continuous improvement in the systems and processes**
   A complete review of the systems and processes is regularly carried out for the smooth, efficient and transparent working of the placement process.
   - Availability of online Placement Portal – very user friendly and popular
   - Well documented and publicised “Placement Procedure”
   - Pre Placement Interview (PPI) procedure and guide
   - Sample aptitude test guides available on the portal
   - Detailed information about visiting employer company is shared with students
   - Improved communication through SMS and E-mail service
   - Departmental SPA committee for a wider faculty involvement

6. **Higher and better job placements with a wider industry reach**
   The focus has always been to widen the industry reach and get better salary packages for our students. Efforts are made to reach out to a very large number of companies across all verticals and invite them to the campus for carrying out their placement process. It has been achieved by:
   - Targeting all companies already visiting NCU and all other leading companies
   - Increased focus to invite Small & Medium Enterprises (SMEs)
   - Improved networking with the industry
   - Getting additional leads from
     - Student internships
     - Students’ parents
     - Alumni
   - Raise the bar every year for the salary package being offered before accepting the companies to conduct campus placement drive at NCU.

7. **Obtaining industry feedback for improving the academic curriculum**
   Identification of a gap between the skills of students and industry requirements is a continuous growing process. Efforts are made to obtain industry feedback at the end of each placement drive to identify the gaps and share with the respective HODs on a regular basis. Accordingly, changes are made in the academic curriculum.
SPA at NCU stands committed for hand-holding the students right from the time of their joining the university till they join their dream companies and even thereafter as an alumni for the benefit of their younger college mates in getting better job opportunities.

We wish all the students a great academic learning during their stay here at NCU and an equally rewarding career.

B K Gupta
Director
SPA, NCU

“Deloitte” is the brand under which tens of thousands of dedicated professionals in independent firms throughout the world collaborate to provide audit, consulting, financial advisory, risk management, and tax services to selected clients. These firms are members of Deloitte Touche Tohmatsu Limited (DTTL), a UK private company limited by guarantee. Each member firm provides services in a particular geographic area and is subject to the laws and professional regulations of the particular country or countries in which it operates. DTTL and each DTTL member firm is a separate and distinct legal entity. Each DTTL member firm is structured
differently in accordance with national laws, regulations, customary practice, and other factors and may secure the provision of professional services in their territories through subsidiaries, affiliates, and/or other entities. In the United States, Deloitte LLP is the member firm of DTTL.

Optimus is designed to help global organizations address their information needs. The world of information is changing and so are the methods of managing it. They provide outsourced technology services to mid-sized organizations that have different needs than Fortune 500 companies. Optimus is designed to meet these specific needs. The demand for outsourced technology services is increasing as organizations seek to increase their efficiency. This trend has been improved through advancements in technology and telecommunications that now allow outsourcing services to offer seamless services all over
the globe. Though outsourcing is a maturing market, mid-sized software companies and enterprises often struggle to find a reliable, nimble, and capable outsourcing vendor. Optimus has the right mix of size, flexibility, and experience to provide high quality outsourcing solutions to mid-sized software companies and enterprises.

Everyone wants to use energy more efficiently; by monitoring and reporting consumption, Secure Meters Ltd, empower people to make a real difference by reducing the energy they use. This helps them to reduce their impact on the environment and to safeguard energy supplies. Their meters and solutions are smart, allowing energy suppliers to engage users through a pragmatic and responsible use of technology. By working together, the national carbon footprint is reduced; with everyone making small adjustments, they make a big difference overall. A desire to identify customer needs and map them to a solution is what drives them to develop and deliver innovative and appropriate solutions. Their customers identify with this and want to work with them. Whilst working together, they look beyond present solutions to those that address the problems of the future. Their approach with you their customers, is to develop a responsible long term relationship with you, in order to drive forward together towards energy consciousness. To deliver the best to their customers they work proactively with their suppliers and other stakeholders. Only through partnering with all their stakeholders, can they give their best in quality, in technology and deliver all this in time.

Sona BLW Precision Forgings Limited is an ISO/TS 16949 and an ISO 14001:2004 company is a joint venture between Sona Holding and Mitsubishi Materials Corporation, Japan. Sona BLW Precision Forgings Ltd. was formed in 1995 and began commercial production in November 1996. The company is engaged in the manufacturing of Precision Forged (net shaped) Bevel Gears, Differential Case Assemblies and Synchroniser rings for Automotive and other applications. The Precision Forged gears offered by us have improved strength and are cost effective as compared to other available technologies, as it involves less machining. Precision Forged components have higher mechanical strength due to uninterrupted grain flow along the tooth flanks and contours. The teeth can be connected to the body with a web for further strength.

Fidelity Worldwide Investment was established in 1969 as the international investment arm of Fidelity Management and Research Company, founded by Edward C Johnson II in 1946 in Boston. In 1980, we became independent of the US organisation, and are today mainly owned by management and Johnson family interests. Fidelity Worldwide Investment is an asset manager serving retail, wholesale and institutional investors in 25
countries globally outside North America. With USD $276 billion assets under management (AuM), they are one of the world’s largest providers of active investment strategies and retirement solutions. Their 6,900 employees serve millions of retail clients and intermediaries such as banks, financial advisers, and insurance companies. Their more than 450 institutional clients include pension funds, life insurers, endowment funds, family offices, and sovereign wealth funds. Around 850 companies trust us with investing or administering their employees’ pension assets. Investment is their only business: They have no competing financial services activities, and are focused entirely on enabling their clients to achieve financial goals through outstanding investment solutions and service. Open-ended mutual funds, which provide investors with liquid access to all major asset classes, are the main products of Fidelity Worldwide Investment.

Aspiring Minds Assessment Private Limited is an Indian "employability evaluation and certification company", headquartered in Gurgaon with an office in Bangalore and a pan-Indian operational presence. The company was founded by Himanshu Aggarwal and Varun Aggarwal in 2007 to enable equal opportunity for entry level talent, and to help companies hire the right candidate in a well scaled and consistent manner. In 2011, Aspiring Minds raised funds led by Omidyar Network, to increase its services and offerings and to expand to new locations. Aspiring Minds has been covered by various news portals including The Economic Times, The Hindu, Business Standard, Hindustan Times, The Financial Express and One India. Aspiring Minds developed the employability test – Aspiring Minds Computer Adaptive Test or AMCAT. Graduates and students can take this test to present a picture of their skills and abilities to the companies. Companies can hire the candidates directly from the database or from Aspiring Minds’ Assessment service.

With over 35 years of building monarchical palaces as well as luxurious villas and hotels in the Middle-East, Mr. P.N.C. Menon embarked on his entrepreneurial journey in India in the year 1994. In an era, when the construction industry was in its nascent stage, Mr. Menon revolutionised the industry by introducing world-class quality construction at truly affordable prices with focus on timely delivery. He helped shape the future of the real estate sector in India with his eye for detail and his determination to persistently deliver best-in-class products.
The year 2015 marked the completion of 20 years of Mr. Menon’s steadfast commitment to excellence. What began as a small enterprise in Bangalore two decades ago, is now a builder extraordinaire – a force to reckon with.

- In 2006, they went public through their initial public offering, an event that created history when the issue got oversubscribed by a record 126 times!
- Today, they are a Rs. 25 billion company and one of the largest and the only full-fledged backward integrated real estate player in the country. Backward integration model at Sobha includes an interiors division with one of India’s largest woodworking factories, a glazing and metal works factory, and a concrete products factory.
- Since inception, they have strived for benchmark quality, customer centric approach, robust engineering, in-house research, uncompromising business ethics, timeless values and transparency in all spheres of business conduct, making Sobha a preferred real estate brand in India.
- They are headquartered in Bangalore and they are primarily focused on residential and contractual projects. Their residential projects include presidential villas, row houses, luxury and super luxury apartments, plotted development and aspirational homes complete with foremost amenities. They strongly emphasise on environmental management, rain water harvesting and high safety standards in all their residential projects.
