SCHOOL OF PROFESSIONAL ATTACHMENT

CAMPUS PLACEMENTS

SCHOOL OF ENGINEERING & TECHNOLOGY

CLASS OF 2018
I. School of Professional Attachment (SPA)

School of Professional Attachment (SPA) has been established at NCU to build and enrich your potential and help you plan your career better. SPA will nurture you from the time you join the University till you finally get a good placement – it acts as a bridge between you and your first job. For your holistic development, ready to face contemporary challenges of the corporate world and for your smooth transition from the campus to the corporate world, SPA will equip you with the right kind of skills and attitude so that you can become more effective, efficient and productive in your employer’s organization.

The University is proud of its students who have been serving in various capacities as technocrats, business managers, industrialists and entrepreneurs. The most frequently cited accolades regarding our students from the organizations which are regular recruiters from NCU include our students’ flexibility, ability to learn quickly, versatility, performance as team players, excellent analytical skills, and most importantly the positive attitude that they bring to their jobs. We are confident that our students will make a mark wherever they go and make their alma mater proud.

II. Role of SPA

SPA is engaged in carrying out the following tasks:

1. Enhancing student employability
2. Improved industry internship attachment
3. Career counseling and gap analysis
4. Continuous improvement in the systems and processes
5. Higher and better job placements with a wider industry reach
6. Obtaining industry feedback for improving the academic curriculum
Enhancing Student Employability

In addition to the hard (technical) skills, soft skills are required to be developed by a student to enhance employability. Soft skills are the abilities and traits pertaining to personality, attitude and behavior. It helps to raise your EQ (Emotional Intelligence Quotient). There is a strong need to acquire these skills right from the moment you enter the first year of professional studies, rather than waiting until the final year or just before the job placement selection process begins.

There is an important saying ‘Technical Skills will get you the interview, but it’s your Soft Skills that get you the job’. At NCU your soft skills are developed through a series of initiatives:

- SPA engages in a regular interaction with the students starting from their induction into the university until the time they are placed.
- Prepare the students for all the facets of placement process:
  - Conduct online mock aptitude tests
  - Arrange Pre Placement Interviews (PPIs) – a full dress rehearsal for facing the job placement interviews.
  - Practice for Group Discussions (GDs)
  - Inputs for improving presentation skills
  - Share “Information Bulletin” to keep the students well informed.
- Invited Talks – by inviting industry experts from perspective employers

An internship gives the opportunity to develop relevant skills, knowledge and experience. Industry internship provides you the opportunity to get attached to a professional organization, on a full-time basis, for a period of six to ten weeks to:

- Get exposed to a real-life work environment to acquire first-hand practical experience and sharpen your skills in tune with the requirements of the industry.
- Interact with real-life working professionals and gain valuable references to gain an edge for better job placements.
- Apply theoretical knowledge gained through academic studies to the workplace, and blend it with real-life practical situations.
- Serve as an opportunity to showcase your potential for a prospective employment opportunity with the same organization.

Internship thus acts as a stepping stone for entering into the professional world with the required skills. The job market is competitive and by showing your commitment as soon as you can, you will stand out. SPA extends all possible help in getting you placed with an appropriate company for your internship so that you get career-related work experience.

Career counseling and gap analysis

It has been seen over the years that students run only to what is visible e.g., the salary offered and don’t understand the importance of a suitable job profile. Personal one-on-one counseling sessions are held in helping to bridge the gap.

- Scanning and explaining the job profiles offered by the companies.
- Detailed interactive sessions with the students to clear their doubts.
Continuous improvement in the systems and processes

A complete review of the systems and processes is regularly carried out for the smooth, efficient and transparent working of the placement process.

- Availability of online Placement Portal—very user-friendly and popular
- Well documented and publicized "Placement Procedure"
- Pre Placement Interview (PPI) procedure and guide
- Sample aptitude test guides available on the portal
- Detailed information about visiting employer company is shared with students
- Improved communication through SMS and E-mail service
- Departmental SPA committee for a wider faculty involvement

Higher and better job placements with a wider industry reach

The focus has always been to widen the industry reach and get better salary packages for our students. Efforts are made to reach out to a very large number of companies across all verticals and invite them to the campus for carrying out their placement process. It has been achieved by:

- Targeting all companies already visiting NCU and all other leading companies
- Increased focus to invite Small & Medium Enterprises (SMEs)
- Improved networking with the industry
- Getting additional leads from
  - Student Internships
  - Students’ parents
  - Alumni
- Raise the bar every year for the salary package being offered before accepting the companies to conduct campus placement drive at NCU.

Obtaining industry feedback for improving the academic curriculum

Identification of a gap between the skills of students and industry requirements is a continuous growing process. Efforts are made to obtain industry feedback at the end of each placement drive to identify the gaps and share with the respective HODs on a regular basis. Accordingly, changes are made in the academic curriculum.

SPA stands committed to hand-holding you right from the time you join the University till you join your dream company and even thereafter as alumni, for the benefit of providing the wisdom of your experience to your younger college mates in the form of career counseling and getting better job opportunities. We wish you a great learning experience here at The NorthCap University and an equally rewarding career thereafter.

Campus Placement Record

The University is a preferred destination for most of the MNCs for hiring students from various streams of Engineering, Management and Law. More than a hundred companies visit NCU regularly every year for carrying out placement drives and generally end up picking up higher numbers than what they had originally planned based on the performance of our students. The University boasts of an excellent track record of placements.
The University has strong links with a variety of employers – from startups to multinational corporations – all operating across a multitude of sectors. Efforts of SPA have resulted in quality placements of students over the years, in premier companies like Deloitte Consulting, Ernst & Young, McKinsey & Company, Fidelity International, Intel, Protiviti Consulting, Siemens, Daikin, Orange Business Services, Ericsson Global, British Telecom, Optum, Yatra.com, Libsys Corp., Newgen Software, Nagarro Software, Maruti Suzuki, CB&I, Samsung Engineering, SK Engineering, Think Future Technologies, Mentor Graphics and many others.

A positive feedback of the previously employed students, from the employers, has resulted in these companies continuing to return for campus placements with more inclusions each year. Besides securing job placements, a number of our students have gone in for higher studies in India and abroad.

Mr B K Gupta
Director,
School of Professional Attachment
SPA at NCU stands committed for hand-holding the students right from the time of their joining the university till they join their dream companies and even thereafter as an alumni for the benefit of their younger college mates in getting better job opportunities.

We wish all the students a great academic learning during their stay here at NCU and an equally rewarding career.

B K Gupta
Director
SPA, NCU

“Deloitte” is the brand under which tens of thousands of dedicated professionals in independent firms throughout the world collaborate to provide audit, consulting, financial advisory, risk management, and tax services to selected clients. These firms are members of Deloitte Touche Tohmatsu Limited (DTTL), a UK private company limited by guarantee. Each member firm provides services in a particular geographic area and is subject to the laws and professional regulations of the particular country or countries in which it operates. DTTL and each DTTL member firm is a separate and distinct legal entity. Each DTTL member firm is structured differently in accordance with national laws, regulations, customary practice, and other factors and may secure the provision of professional services in their territories through subsidiaries, affiliates, and/or other entities. In the United States, Deloitte LLP is the member firm of DTTL.

Fidelity Worldwide Investment was established in 1969 as the international investment arm of Fidelity Management and Research Company, founded by Edward C Johnson II in 1946 in Boston. In 1980, we became independent of the US organisation, and are today mainly owned by management and Johnson family interests. Fidelity Worldwide Investment is an asset manager serving retail, wholesale and institutional investors in 25 countries globally outside North America. With USD $276 billion assets under management (AuM), they are one of the world’s largest providers of active investment strategies and retirement solutions. Their 6,900 employees serve millions of retail clients and intermediaries such as banks, financial advisers, and insurance companies. Their more than 450 institutional clients include pension funds, life insurers, endowment funds, family offices, and sovereign wealth funds. Around 850 companies trust us with investing or administering their employees’ pension assets. Investment is their only business: They have no competing financial services activities, and are focused entirely on enabling their clients to achieve financial goals through outstanding investment solutions and service. Open-ended mutual funds, which provide investors with liquid access to all major asset classes, are the main products of Fidelity Worldwide Investment.

Think & Learn Pvt Ltd is a pioneer in the global edtech segment and the parent company of Byju’s the Learning app, the largest K12 learning app in the world with over 10 million students learning with us. A winner of the Deloitte Fastest 50 India Award for six years in a row and a winner of the Fastest 300 Asia Award for the last three years, the company has doubled its growth year on year. Byju’s the Learning App provides lessons in math and science for students from grade 4 to 12 through formats such as videos, tests, quizzes, personalised learning paths and even games. There are programs also for competitive examinations like the JEE, NEET, CAT, GRE, GMAT and UPSC. Byju’s Learning App is a giant in the global edtech space with an array of investors valuing the company at thousands of crores. It was also the first Asian company to get the backing of Facebook’s founder Mark Zuckerberg. Our employees can look forward to multiple benefit schemes starting from incentives, impact bonuses, travel incentives, health benefits and much more & if you are passionate about making India and the world Think & Learn through various platforms, modes and pedagogies then look no further!
Social Curry was started with the goal of making all of the daily lives of Indians more fulfilling. We aim to help neighbours support one another in their day to day activities. Whether it be finding the ideal after school classes for their kids, growing your friend network, collaborating on issues that impact the community or organizing get-togethers that bring them closer.

We are driven to put in place a great platform to capture and share tribal knowledge that exists in each Indian neighbourhood, so all of us feel more at home in the places we live.

Lutron is a technology-centered and people-driven company. As a private corporation guided by our founder’s simple but profound Five Principles, Lutron has a long history of significant growth and smart innovations. The Lutron story began in the late 1950s in Joel Spira’s makeshift lab in New York City. A young physicist fascinated by the aesthetic manipulation of light, Spira commandeered the spare bedroom in the apartment he shared with his wife, Ruth, and set out to invent a solid-state device that would enable people to vary the intensity of the lights in their homes. The very idea was radical. At that time, lighting control was a complicated and expensive affair, requiring bulky rheostats that used a lot of energy and generated a great deal of heat. Consequently, lighting controls were used primarily to dim stage lights in theaters. Most people would never think of having dimmers in their homes because they were just too difficult to install. That all changed in 1959, when Spira emerged from his lab with a solid-state dimmer that could replace the light switch in a standard residential wallbox.

Spira’s key technical innovation had been to replace the rheostat with a thyristor. A thyristor is a type of transistor, which had been invented a few years earlier. The substitution was effective because rheostats and thyristors worked in completely different ways. Rheostats dimmed lights by absorbing electrical energy into the rheostat, meaning that electricity was converted to heat in the rheostat rather than to light in the lamp. By comparison, thyristors dimmed the light by interrupting the power flowing to the lamp. The use of a thyristor shrank the size of a dimmer until it could fit into a standard wallbox. Spira’s dimmer also generated much less heat than a rheostat and used much less energy.

By 1961, when Joel and Ruth Spira incorporated Lutron Electronics, they knew that lighting control could contribute to society in multiple ways. Dimmers were both elegant and useful, and they allowed people to control their lights as never before. Dimmers were practical too. They saved energy, and the more you used them, the more energy they saved. With energy costs already going up, the Spiras believed that the energy-saving aspects of the new invention would ensure the long-term appeal of lighting controls.

Cadence Design System

Cadence is the only company that provides the expertise and tools, IP, and hardware required for the entire electronics design chain, from chip design to chip packaging to boards and to systems. They enable electronic systems and semiconductor companies to create innovative products that transform the way people live, work, and play. Their products are used in mobile, consumer, cloud datacenter, automotive, aerospace, IoT, industrial and other market segments. Their System Design Enablement strategy guides everything they do, from their product line-up to the expertise and services they offer their customers and the partnerships they develop with other industry leaders. They believe that giving their customers a systems-level perspective throughout the design cycle pays off in faster and better design, shorter verification cycles, software that works with the hardware, and new product leadership.

Chapter Apps Inc is an emerging startup focused on the Mobile Learning space. It is a US company incorporated in Silicon Valley along with an accelerator, called Studio9Plus. Other investors include seasoned professionals based all over the world. Guiding Star Digital Publishers LLP owns a majority of equity in Chapter Apps Inc and is the India based development partner of Chapter Apps Inc.

The organization provides a wide range of elearning solutions in the SAAS, PAAS model for B2B and B2C customers. Our platform has been built with a user centric focus on learning, and supports multiple content formats including micro-content bytes, flash cards, quizzes, videos, podcasts, newsfeeds, as well as html formats that are easily searchable. The key goal is to have a user find the information they are looking for easily, understand it quickly and then be able to perform better at their role. Our key focus is on increasing product knowledge and imparting training on soft skills, through micro-learning with short 10-15 minute courses that can be reinforced repeatedly.

It also helps the corporates by providing customized elearning solutions and data analytics. This is of great benefit to companies for training (including remote training), monitoring various activities and operations, uploading and distributing their own in-house material and a host of other meaningful features all of which work on a mobile app, and in-house networks at a very low cost.

WE ARE GROZ & We are addicted to excellence. We work with men & metal to engineer tools. We are young and we carry in us passion, desire & commitment to excel. As a technology leader we specialize in design, manufacture & marketing of a vast range of tools & equipment. Driven by a strong value system, state of the art manufacturing facilities & an enthusiastic team of men & women, we are focused to position Groz as a premier Global enterprise.

HOW THEY DO IT : Total Control - Over 2000 dedicated men & women walk the aisles of our production facilities to convert several tonnes of metal into premium grade engineering solutions. With more than two hundred engineers & technicians, we are amongst the largest & most modern plants in Asia.

Think Design - The heart of our operation is the design center, where our researchers use high-end software and equipment to develop custom solutions for the needs of our clients. Fresh thought from bright, sparkling minds is channelized by experienced stalwarts into genuine, innovative solutions. At Groz, we design at least a score of new products every year.

Stamp of Pride - At Groz, we set standards of excellence and then go on to exceed them. Stringent system and processes are constantly monitored to ensure the highest level of conformance and consistency at all stages of production - right from the selection of raw materials to the dispatch of finished goods. With our impeccable track record, we have gained the trust of some of the most respected names in the industry. With pride, we say, we make tools to trust!

Make them Happy - In the world of cold steel and sharp metals, we have managed to preserve our heart. We are sensitive to human emotions and relationships. When customers begin a relationship with us, chances are they will still be talking to the same person for all their needs even after several years. We do not just serve our customers - we empathize with them and put our heart and soul into making them happy. We're passionate about retaining, developing and recruiting the best talent available. We are team with involvement of all. We have high integrity & respect for others. We are accountable for results.

Sapient was founded on November 6, 1990. The two founders, Jerry Greenberg and Stuart Moore, met at Cambridge Technology Partners, an IT services company located in Cambridge, Massachusetts. The co-founders recognized the need for a different type of mindset in the IT consulting world. Sapient chose to use a fixed-term, fixed-price model for pricing projects, rather than charging on a time and materials basis. In addition, Greenberg and Moore relied on their own resources instead of venture capital to fund the company's operations. This allowed them to keep control of the organization and set long-term strategic goals. During this period, Sapient was also an early adopter of internet-based technology, and internet-based work grew to over 70% of total revenue by 1999. Both client satisfaction and the pioneering use of the internet led to rapid growth in the period from 1992 to 2000, with revenue growing from $950,000 in 1992 to $503 million in 2000.

Sapient is a marketing and consulting company that provides business, marketing, and technology services to clients. The company operates three divisions, SapientRazorfish, Sapient Global Markets and Sapient Government Services. On February 5, 2015, Sapient became a fully owned division of French advertising giant Publicis, in a deal valued at $3.7bn (£2.3bn). On November 17, 2016, SapientNitro was merged with sister agency Razorfish to form SapientRazorfish, which will be co-led by former SapientNitro CEO Alan Wexler and Sapient Consulting CEO Chip Register.
SeaFaradays, a first of its kind startup company, has been setup to harness the Offshore Renewable Energy and place India amongst the very few countries to take lead in Ocean Energy. In our endeavor to “Make in India” we are collaborating with foreign OEMs to bring the best technologies in Offshore Renewables under technology transfer and boost the local content and eventually setup India as base for manufacturing and supplying across the globe.

We at SeaFaradays aim to be responsible contributors towards bringing the abundant unharnessed offshore energy to the shores and help India achieve its Renewable Targets which can only be met by an optimum mix of Renewable energies. There is an imminent need to move beyond the convention – Solar & Wind, and take steps to harness the abundant and reliable – Ocean energy having the potential to cater to the current and future power needs of the entire country. India boasts of a coastline of over 7500 Km and in a populous country like ours land is a scarcity and considering the desired agricultural produce, ever growing industrialization and Urbanization, land will become even scarcer as India accelerates and continues to grow.

SeaFaradays, having necessary technical know-how and logistics capability to provide various services in Offshore Industry, a Company setup with the intent of meeting the growing Energy needs of the world and are desirous of / power projects in India and similar opportunities elsewhere. With Promoters being pioneers of offshore industry in India, jointly have over 100 years of vast experience in Extensive Construction, Project Management and EPC experience in areas including but not limited to Offshore Oil & Gas, Energy, Port and Marine infrastructure projects in India and elsewhere. With Promoters ability to optimize installation costs, achieve efficiency and deliver the works safely, SeaFaradays shall foray into all spheres of offshore renewable energy business namely but not limited to Wind, Tidal, Hydro, Wave and Hybrid.

TNT Motorcycles is a motorcycle and automobile customization firm based at New Delhi, India. We also fabricate specialized performance parts and accessories for both commuters and bike builders as well. All team members are Automobile and Mechanical Engineers and motorcycle enthusiasts. The forever dream of owning a custom motorcycle, led us to test the waters. With a collective experience of 17 years in design, manufacturing and development in major OEMs, we started building a Zero Chop with IBW 2014 as deadline. As a result “Shunya” was conceived with 90% in-house machining and fabrication. The crowd’s reaction at the event was over-whelming and the build was appreciated for its low slung chopper styling. The positive response at the event led us to quit our 9 to 5 corporate jobs and be a professional builder. IBW 2014 concluded in January and TNT Motorcycles started operations from March 2014.

Universal Technical Systems, Inc. (UTS) is a software products and custom software development company. It is a privately held Illinois corporation, established in 1984 and headquartered in Loves Park, Illinois. UTS is part of a family of companies, including Universal Technical Systems (Europe), Ltd, and Universal Technical Systems (India) Private Limited. UTS Europe, which is based in the UK, was established in 1996 to offer UTS software products, services, and technical support to customers within the European community. UTS Europe quickly established itself to aid and assist its large and constantly expanding customer base. UTS India markets to customers within India and provides services such as software development and custom graphics to UTS.

The initial products offered by UTS consisted of an expert system software suite for computer-assisted gear design and manufacturing. UTS has been a leading provider of gear software and related services ever since. The company’s scope of operation broadened substantially with the purchase of the TK Solver product line from Lotus Development Corporation at the end of 1985. TK Solver was originally developed and marketed by Software Arts, Inc., the legendary inventors of VisiCalc, the first ever electronic spreadsheet. Lotus had acquired TK Solver when it took over selected Software Arts assets in 1985.

UTS quickly became the leading supplier of high-productivity problem-solving software solutions to engineers, scientists, financial analysts and other professionals in quantitative fields. The combination of the unique features of TK Solver and the advancements in PC hardware and system software keeps extending the company’s technical and business opportunities at a fast pace. TK users, old hands and novices, find the current TK Solver for Windows (Release 5.0) to be a mathematical modeling and knowledge management system of unprecedented power and ease of use.

UTS responds to new challenges by strengthening its TK application development and consulting services. This includes special emphasis on integrating TK Solver with other software products and in the computerization of corporate design manuals and product selectors.

Some of the latest offerings from UTS include: web based applications development for enterprise wide use, product and sales configurators with built in applications, and engineering and eLearning course development to meet specific customer needs.

A young global smartphone brand focusing on introducing perfect sound quality and ultimate photography with cutting-edge technology, Vivo develops dynamic and stylish products for passionate young people. It develops and manufactures smartphones, smartphone accessories, software, and online services. Founded in 2009, Vivo has quickly expanded into markets in India and South East Asia.

At Vivo we are dedicated to the pursuit of perfection and continuously creating surprises for users through constant innovation. Pioneering the use of Hi-Fi audio chips in smartphones, Vivo created the very first smartphone with a dedicated Hi-Fi chip, the X1. Since then Vivo has remained committed to providing the very best possible audio experience to customers.

Our product’s camera also represents one of our most important competitive advantages. Photography is a way for people to express themselves and share joy with others. Through our smartphones, we offer users a professional-grade photography solution, taking mobile photography to the level of an art form, witnessing and recording all of life's beautiful moments.

Yatra.com is an Indian online travel agency and a travel search engine based in Gurgaon, Haryana, founded by Dhruv Shringi, Manish Amin and Sabina Chopra in August 2006. In April 2012, it was the second largest online travel website in India, with 30 per cent share of the ₹370 billion (US$5.7 billion) market for all online travel-related transactions. It also launched a “holiday-cum-shopping card” with State Bank of India (SBI), India’s largest bank. Yatra.com publicly listed on the NASDAQ under the ticker symbol YTRA in December 2016.

Acquisition

Yatra.com has made three acquisitions to date — ticket consolidator Travel Services International (TSI) in October 2010, global distribution system (GDS) provider MagicRooms.in, and Indian events and entertainment portal BuzzInTown.com — all for undisclosed amounts. In July 2012, Yatra.com acquired a 100% stake in Travelguru.com.

Online Tyari

OnlineTyari (OT) is India’s largest multi-lingual platform for test preparation founded by IIT Kanpur and IIM Ahmedabad alumni. We are backed by marquee investors like Michael & Susan Dell Foundation, Contrarian Fund, Mohandas Pai, Tracxn Labs, 500Startups, etc. The founders are serial entrepreneurs and ex-investors and also have significant experience with companies like Microsoft, Nexus Ventures and Kotak Private Equity.

OnlineTyari is first of its kind online marketplace for exam preparation for SSC, IAS, IBPS and many other competitive exams. We have become the preferred destination for both content providers and students.

Within one year of inception, we are already the biggest education app in India by a huge margin. With 4 million+ app downloads and 4 lakh+ people using our platform every single day, our app usage is increasing exponentially month on month. More than 750 million questions have been attempted by students on the OT platform. OnlineTyari is poised for a massive growth as mobile internet revolution is providing a gateway to millions of Indians to fulfill their aspirations.

With a strong management team of IIT and IIM alumni and backing of marquee investors, we are scaling new heights every day and disrupting the traditional education sector with smart technologies.

Plasser India manufactures the most up-to-date high performance machines for track maintenance, which are highly sophisticated products. The machines for Indian Railways are tailor-made designs with special emphasis on applying the technology most appropriate for the local conditions. Production in India ensures a high indigenous content, using a large number of Indian suppliers. There is a story behind every organization. The story of Plasser India is one of the quality, innovation & trust. Starting delivery of first track maintenance machine to Indian railways in 1965 was the first step on our new beginning in India. They have been setting technological milestone, enabling higher working speeds, higher quality and economic advantages for their customers and the railways. For over 50 years, Plasser India has concentrated on the development, manufacture and export of track maintenance machines. They have become a part of the railway system and have made great contribution towards its safety, reliability and cost-efficiency. Their parent company Plasser & Theurer (Austria—Europe) is currently operating in over 100 countries and many of them for decades. Till day they have supplied to Indian railway more than 700 track maintenance machines.
