

B.Com Hons

Objectives:

Our objective is to provide quality higher education to students with emphasis on industry oriented, student-focused, accessible and affordable programs, which prepare them for service and leadership in a diverse business community.

B.Com Hons program focuses on building leadership capability amongst aspiring candidates. This programme will build students' fundamental skills they need to not only manage a business but to successfully navigate the technology they'll require to do it.

Highlights:

- The **B.Com (Hons)** programme at NCU-SOM will provide adequate knowledge in theory and practice relative to effective implementation of various decisions for successful business outcomes.
- This program will prepare students for service and leadership in diverse business situations.
- Students can expect to learn business skills for present day business environment, in addition to taking courses on, database management, information security, IT, and supply chain management etc.
- The Program will prepare participants for successful planning and implementation of initiatives and enable them to build collaborative networks with software engineers and IT professionals.
- This programme with its options for 'Personal Grooming' prepares students for civil services examination.
- We believe that after undertaking this programme students will be fully equipped to handle challenges which business world will present to them.
